

How to install the MAXitViewer for FrameMaker (all versions)

1. Download **fmvsetup.exe** from the <http://www.smartny.com/support.htm>
2. Click the **fmvsetup.exe** icon.
3. Follow the prompts from the **Installshield** program.
4. Enter one of the keys, shown below, that matches your version of FrameMaker.

Version FrameMaker6.0	Enter: fm60-a-viewer
Version FrameMaker7.0	Enter: fm70-a-viewer
Version FrameMaker7.1	Enter: fm71-a-viewer
Version FrameMaker7.2	Enter: fm72-a-viewer
Version FrameMaker8.0	Enter: fm80-a-viewer
Version FrameMaker9.0	Enter: fm90-a-viewer
5. See the **MAXitViewer** menu on the FrameMaker menu bar for instructions.

How to remove MAXit from your computer

1. Select the test file from the folder **C:\Program Files\Maxit\Samples**.
2. Click the **Remove MAXitViewer** item on the **MAXit** menu, as shown above.
3. Manually delete the folder and subfolders in **C:\Program Files\Maxit**.

A note about your test files from the QuickLook:

Your test files are in the folder **C:\Program Files\Maxit\Samples**.

Load each file in your copy of FrameMaker (any version).

You will see colored markers that are the **MAXit** markers.

Move the cursor over a colored word and use the sequence shown here to see each message.

show the **MAXit** markers and the suggestion boxes. Explore the **MAXit** menus to discover the types of grammar and syntax messages.

In the full version of **MAXit**, you can remove these marks and quickly create another report while you edit. You must use the "CLAW" key sequence shown left, to activate the hypertext links inside FrameMaker. These links
