

The **SMART Lexicon Manager** manages and builds the dictionaries for all versions of the **MAXit Checker**.

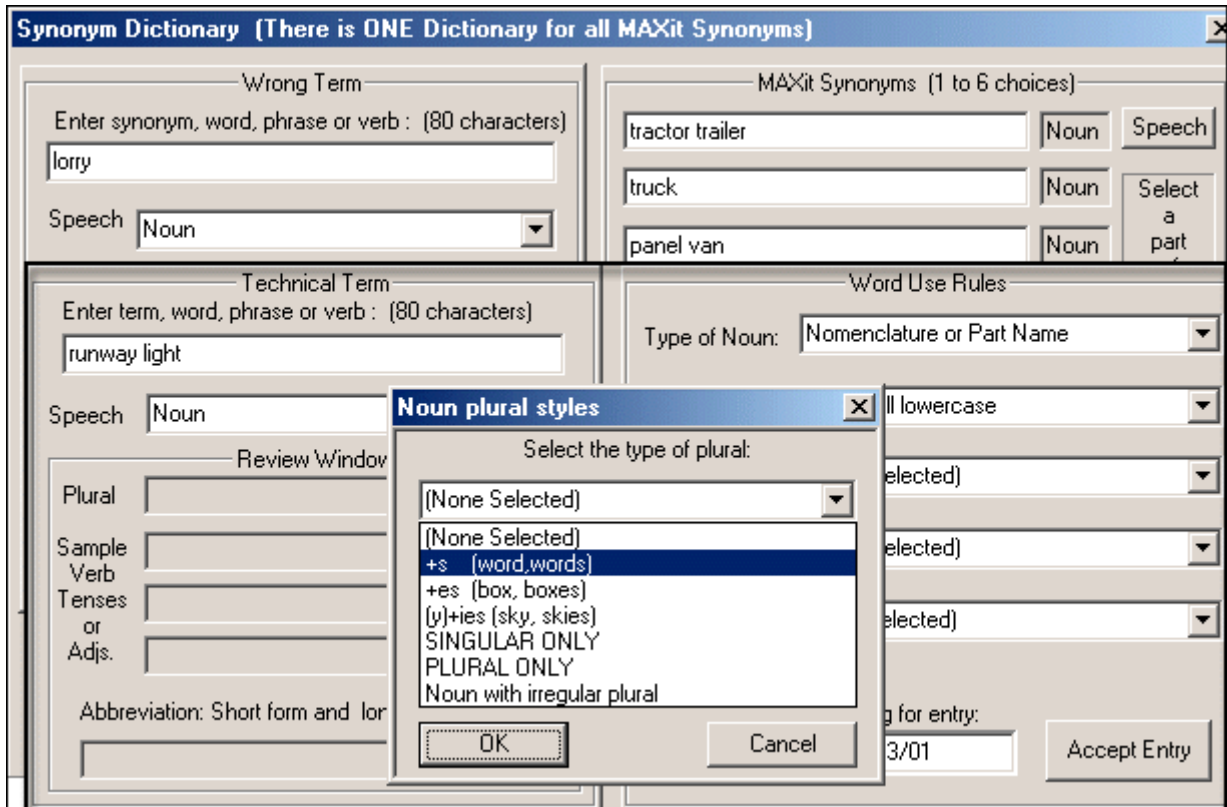

This software tool lets you **View, Add, Change and Delete** terms to the dictionaries.

The **SMART Lexicon Manager** adds the linguistic tags for parts of speech, number, usage rules, conjugation, terminology and word classification.

Features of the SMART Lexicon Manager

- An easy-to-use point and click interface (two screens).
- All linguistic tags and rules are validated on data entry.
- A knowledge of complex linguistics is not required.
- The program adds and checks more than 100 linguistic variables, including multiple parts of speech.
- Fast entry of terms and rules (50 entries per hour).
- Easy entry of corrections in the "reverse dictionary".
- On-line ability to review and search dictionaries.
- A report generator tracks all usage and changes by date or a user tag.
- Ability to create high-compression dictionaries for use on all platforms and versions of the **MAXit Checker**.
- Options to prepare paper and electronic dictionaries.
- Automatic distribution of compressed dictionaries to global users from one central server.
- Ability to prepare dictionaries in HTML, WORD, FrameMaker, Palm PDA and ASCII files.

The SMART Lexicon Manager has two easy-to-use screens, shown below.

The **SMART Lexicon Manager** lets the user create, view and manage the **MAXit** dictionaries. An option writes the dictionaries in FrameMaker, WORD, PDF, SGML/XML and HTML formats.
